1. The term “information...” refers to the social, economic, technological, and cultural changes that have occurred as a result of the rapid development and extensive use of information and communication technologies
2. Speaking about the development of the information society in Russia, I. N. Kurnosov writes that “the strategy for the formation of the information society in the transition period to a new system of property relations ... take into account the special role and responsibility of the state”
3. The information society is established in those countries – ... – in which a post-industrial society was formed in the 60s and 70s
4. The network can serve as a means of ... propaganda materials of criminal organizations, recipes for the manufacture of explosives and poisonous substances, weapons, narcotic and psychotropic drugs, and methods for breaking electronic and other ciphers
5. One of the advantages of Russia is an advantageous geographical location between trade and information and telecommunication flows ...
6. It ... be noted that the problem of inequality in access to new information technologies is acute not only at the international level, but also at the micro level within each individual state
7. The term “developed post-industrial society” was introduced by ...
8. The largest number of internet users currently in ...
9. According to the ... criterion highlighted by W. Martin, the main characteristics of the information society are information technology, which is widely used in production, institutions, the education system and in everyday life
10. The total value of goods and services produced by a country in one year is ... (give the abbreviation)
11. Information ... must be viewed from two perspectives: as an independent industry, with its science, engineering, and manufacturing capabilities and as a basis for transformation of almost all areas of human activity
12. A system of consumption and production that is based on intellectual capital is ... economy
13. The unfair situation in society when some people have more opportunities, money, etc. than other people, is called ...
14. The “information economy” and “post-industrial society”, two concepts from that period, are still key parts of the information ... concept

15. The stage of society's development when the service sector generates more wealth than the manufacturing sector of the economy is called ... society

16. A process of spreading the use of digital technology such as computers and the internet to do something is called ...

17. Match the main characteristics of the information society according to the following criteria by W. Martin:

18. Match the sentence with the time it was written:

19. Put the number of Internet users worldwide from the largest to the smallest:

20. According to the research company comScore Networks in 2019, the number of Internet users worldwide amounted to 747 million people. The United States has the largest audience of Internet users – 153.4 million people, that is, almost every second American regularly goes online. In second place is China – in China today 86.8 million Internet users. Russia still occupies 13th place in terms of the number of people connected to the Network – 12.7 million people. However, Africa with 800 million people accounts for only 1 % of the total number of its users in the world, with 90 % of them living in South Africa.

Identify the type of information society problem in the above case study.

21. The slide rule in its basic form uses ... logarithmic scales to allow fast multiplication and division of numbers

22. Burroughs converted to electronic desk ... and in the mid to late 1970s their products dropped from the market

23. In 1936, Alan Turing invented a universal machine, which was later called ...

24. The first recognized use of the word "computer" was from ...

25. The explosion in world population and the rise of globalised trade demanded even faster and more flexible tools for processing ...

26. A general-purpose computing device called the analytical engine was developed in 1837 by ...

27. The ... is a small-scale special-purpose electronic digital machine for the solution of systems of linear algebraic equations and the first electronic computer incorporating vacuum tubes for digital computation

28. ... are made for program logic and for computer memory

29. Open the brackets, put the verb in the correct form in sentence: "The power of computers (double) ... roughly every 18 months to 2 years since the 1960s"

45. The early transistors were not only larger than the smallest tubes, but they were also more ...
46. The transistor's most significant advantage over the best vacuum tubes was that it consumed far ...
47. The introduction of microelectronic circuits did not, for the most part, modify the ... of the basic functional units: transistors, resistors, capacitors, and other similar components were still used in microelectronic devices
48. Bell Telephone Laboratories' John Bardeen, Walter H. Brattain, and William Shockley devised the bipolar transistor in ...
49. ... integrated circuits are the name for the initial generations of commercially produced microelectronic devices (SSI)
50. The advent of ways for creating the numerous functional units on a crystal of semiconductor materials was critical to the development of ...
51. Charge carriers from both polarities are involved in the operation of ... transistors
52. The metal-oxide-semiconductor field-effect ..., which stands for MOSFET, is the most common in microelectronics
53. Prior to the transistor's discovery in 1947, the only way to execute its function in an electronic circuit was to use a ... tube
54. Bell Telephone Laboratories' John Bardeen, Walter H. Brattain, and William Shockley devised the ... transistor in 1948
55. "Molecular ..." is a term for data storage technologies that use molecular species as the data storage element, rather than e.g. circuits, magnetics, inorganic materials or physical shapes
56. Medium-scale integrated circuits have more than around 10 ... on a chip but fewer than approximately 200 (MSI)
57. Match the abbreviations and transcripts:
58. Match the parts of one sentence:
59. Match the parts of one sentence:
60. Match the highlighted words with their meaning in the sentence:
61. Arrange the stages in the history of transistors in chronological order:
62. Below is a description of one of the technologies:  
"It is a subfield of electronics. These devices are typically made from semiconductor materials. These include transistors, capacitors, inductors, resistors, diodes and (naturally) insulators and conductors. As a result, this kind of IT has the potential to lower skill requirements in some vocations while raising them in others. It has influenced our daily lives in a variety of

ways, making our routines a little more pleasant”.

Which technology is described in the text?

63. A user cannot send direct instructions to the hardware ... various activities
64. Because of the expense, the system’s productivity had to be increased ... cost effectiveness
65. The introduction of time-sharing systems, in particular, has long been regarded as a watershed moment in the evolution of ... systems
66. The ..., which was introduced in the mid-1950s, made computers more reliable
67. Microsoft Windows eventually surpassed Mac OS ... the world’s most popular personal computer operating system, with over 90 % market share
68. ... created the first operating system for the IBM 701
69. ... was developed by Bell Labs and was the first significant operating system to be written almost entirely in high-level language
70. The Apple Macintosh, a low-cost workstation that emerged from early Alto computer concepts, was released in ...
71. The type of operating system that is not directly linked to the computer is the ... operating system
72. There are some of the potential benefits of distributed operating systems, for example ... (choose 2 correct answers)
73. Open the brackets, put the verb in the correct form in sentence: “There was no such thing when the first computers (develop) ... following WWII”
74. Open the brackets, put the verb in the correct form in sentence: “A more systematic structure (form) ... with the creation of ambitious operating systems in the mid-1960s”
75. Open the brackets, put the verb in the correct form in sentence: “Huge machines capable of conducting numerical calculations (construct) ... in the mid-1940s”
76. Open the brackets, put the verb in the correct form in sentence: “The transistor, which (introduce) ... in the mid-1950s, made computers more reliable”
77. Open the brackets, put the verb in the correct form in sentence: “The addition of support for Linux programs, which (reveal) ... in 2018, was a big advance”

78. Open the brackets, put the verb in the correct form in sentence: "A UNIX based operating system, Solaris (originally develop) ... by Sun Microsystems in the mid-'90s"

79. Open the brackets, put the verb in the correct form in sentence: "Wireless network connectivity (also manage) ... by mobile operating systems"

80. Open the brackets, put the verb in the correct form in sentence: "LibreOffice, Firefox, Thunderbird, Transmission, and lightweight games like Sudoku and chess (include) ... by default, while GNOME Files is the default file manager"

81. Match the names of operating systems with their descriptions:

82. Identify the sequence of generations of computers (by their description):

83. The description of the generation of computers is down below:

"Computers of this generation appeared, when IBM introduced the System/360, a line of software-compatible computers with varying levels of capability and price. Because the machines shared the same architecture and instruction set, programs created for one could be run on the other".

Which generation of computers is described in the text?
